Metin2 switchbot by padmak download minimap_editor video converter pro 9.0 lite full version crack PC GameDeleting a photo from your profile - or not If you don't want someone to be able to see a photo of you when searching for a potential mate in our online dating site then you can delete it. But what if you've already seen the photo and don't want it to go into the public domain but you can't delete it? This is not an uncommon problem and here is how you can overcome it. Firstly, you need to find the photo in your profile. It's usually the last photo attached to your profile and should be visible in the Advanced View of your profile. Click on that image and you should see the above box appear. Click on "Show Original" and the photo will now be visible. You can also remove the photo and keep the link to your profile. However, don't miss the opportunity to remove the photo if you have seen it, then you will still have the link to your profile when a potential suitor clicks on your profile. If you don't want the link to your profile then tick the "Hide from Profile Viewers" box. Alternatively you can use the other settings on the box and can control how far your photo is shown on your profile by adjusting "Display settings". For example, you can make your profile only show your top profile bio - this will prevent showing your photo. However, if you go too far and change the amount of information you want to be displayed on your profile then it will affect how the person sees your photo. If this is a problem, then you may want to keep the photo, but have another photo of yourself displayed. If you do this then you can always change your photo whenever you want. Once you've adjusted your profile to how you want it, be sure to save your changes, otherwise you'll lose your settings. If you're getting distracted by all the ads in our online dating site, you can opt-out.
